

## Can You Hear Me Now – RT Deluxe Model Package

### Overview

This package contains all the 3D modeling files (.STLs) you will need to print your own copy of the Can You Hear Me Now insert for Smartphone Inc. This insert has been designed by Ray Price and is available from [www.storeallthebits.com](http://www.storeallthebits.com)

If you have any questions regarding the contents of this package or printing, please email us at: [ray@storeallthebits.com](mailto:ray@storeallthebits.com)

Please consult the [Can You Hear Me Now? - RT-Deluxe - Tips and Tricks | Store All The Bits](#) page for important information about how to pack the game box, as well as additional information on creating cardboard spacers to use for stabilizing the packing so that pieces do not shift during storage and transport.

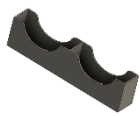

## Licensing

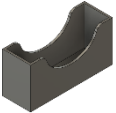

This package of files, identified in the “Print Files” section below, has a non-commercial, personal use only license. These designs are protected by copyright, and you are granted the right to use these files to print them strictly for personal use. You are prohibited from receiving any money, trade, or compensation for these files as well as the 3D prints generated from these files.

The following activities are prohibited:

- Selling or renting the files
- Transferring files to someone else
- Selling or receiving compensation for physical prints made from the files
- Sublicensing the files
- Posting the files to peer networking sites, discussion boards, and/or file catalogs of any nature (including but not limited to Thingiverse, TurboSquid, Shapeways, myminifactory, or any other similar site)

## Print Files

Image	STL File Name	Print Qty	Notes
	SPI-RT-CEOs-B	1	
	SPI-RT-Directives	2	
	SPI-RT-GoodsTechnologies	1	
	SPI-RT-Improvements	1	

	SPI-RT-PlayerTray	5	
	SPI-RT-RetailersMarkersSteve-BGG	1	The indents in the center two walls are sized to store “Improvement” sized tiles in case needed
	SPI-RT-Technologies	1
